South Wye
Safer Neighbourhood Team (SNT)

About your team

Safer Neighbourhood Teams work with local people and partners to identify, tackle and solve issues that matter to the community where you live.

Making neighbourhoods safer by cutting day to day crime and anti-social behaviour is at the heart of keeping people in West Mercia safe. Thanks to an investment in mobile tablet style computers, these will enable officers to spend more time on patrol on the street and in neighbourhoods.

Officers will continue to come to people when they need them and provide a high quality service however you contact us - in person (on the street, at community bases and at partners and communities together [PACT] meetings), on the phone or online.

Thank you to a Proactive Public.

As you may be aware, there are building works going on where the Ship Inn pub used to stand. There's lots of expensive building equipment and machinery, which we know is a favourite of criminals. On a recent evening, a member of the public saw two males in a white van pull up on to the site; these men were dressed in High Vis clothing and wearing hard hats. Most people would have thought this normal and that the builders were working late; Not to this member of the public. It was suspected that these men were up to no good, and officers were called. On arrival the 'acting builders' ran away, however one did not get far and was arrested on site, the other shortly after was found hiding in ASDA. The vehicle was listed as stolen and was on cloned plates, and one of the men was wanted for incidents in the Birmingham area. Both men from the West Midlands have since been charged with burglary.

Thank you to the public to staying proactive and calling the Police to suspicious behaviour; most of the time it may be innocent, but that one time it could be something much more and a call could prevent criminal activity.

What are drones and are they legal?

Drones or Unmanned Aerial Vehicles (UAVs) are essentially flying robots. The aircraft can be remotely controlled or can fly autonomously using inbuilt software controlled flight plans. Designed for designated purposes by the military, they are becoming increasingly popular among members of the public.

If you are considering using a drone for recreational purposes, we would advise that you consider the guidance below:

- You must not fly the drone above 400 feet in altitude or further than 500 metres away from you horizontally.
- If you wish to fly one that exceeds the limits above, you will need to seek permission from the CAA.
- Avoid flying it within 150 metres of a congested area or 50 metres of a person or vehicle.
- Use your common sense and fly safely - making sure you can see the drone at all times.
- If you are using one with a camera, make sure you inform people before you start recording and be aware of your surroundings.

Misuse of a drone can lead to a criminal offence being committed
