HOUSING

LEVEL OF FURTHER DEVELOPMENT

Section 1.1: The housing market is currently in a state of stagnation, with a significant number of properties in the market for sale but few transactions. This is due to a combination of factors, including high interest rates, a lack of confidence among buyers, and a limited supply of new housing stock.

Section 1.2: The current market conditions have led to a significant increase in the number of properties in the market for sale, which has led to a decline in the average selling price. This has had a negative impact on the housing market, as it has led to a loss of confidence among potential buyers.

Section 1.3: The current market conditions have also led to a significant increase in the number of properties in the market for rent, which has led to a decline in the average rental price. This has had a negative impact on the rental market, as it has led to a loss of confidence among potential tenants.

Section 1.4: The current market conditions have also led to a significant increase in the number of properties in the market for lease, which has led to a decline in the average lease price. This has had a negative impact on the lease market, as it has led to a loss of confidence among potential lessees.

Option One: This option involves a significant increase in the number of properties in the market for sale, which would lead to a decline in the average selling price. This option is considered to be the most likely outcome given the current market conditions.

Option Two: This option involves a significant increase in the number of properties in the market for rent, which would lead to a decline in the average rental price. This option is considered to be the most likely outcome given the current market conditions.

Option Three: This option involves a significant increase in the number of properties in the market for lease, which would lead to a decline in the average lease price. This option is considered to be the most likely outcome given the current market conditions.

HOUSING

DEVELOPMENT BOUNDARIES

Development boundaries are defined by the following criteria:

- 1. Proximity to major roads and public transport.
- 2. Availability of services and amenities.
- 3. Environmental and landscape considerations.

SITE ASSESSMENT CRITERIA

Site assessment criteria are used to evaluate the suitability of a site for housing development. The criteria include:

- 1. Land use and zoning.
- 2. Environmental and heritage constraints.
- 3. Infrastructure and services.

Proposed Housing Sites

A table with multiple columns and rows, likely a checklist or data table. The table contains various criteria and their corresponding status or values. The table is partially obscured by a redacted area.

ECONOMY

EXPLAINING & DESCRIBING LOCAL BUSINESS

1. What are the main types of local business?

2. How do these businesses contribute to the local economy?

3. What are the main challenges facing local businesses?

4. How can these challenges be addressed?

5. What are the main opportunities for local businesses?

6. How can these opportunities be exploited?

7. What are the main risks facing local businesses?

8. How can these risks be managed?

9. What are the main factors influencing local business performance?

10. How can these factors be improved?

11. What are the main indicators of local business performance?

12. How can these indicators be used to monitor performance?

13. What are the main reasons for local business failure?

14. How can these reasons be avoided?

15. What are the main reasons for local business success?

16. How can these reasons be replicated?

17. What are the main lessons learned from local business experience?

18. How can these lessons be applied to other local businesses?

19. What are the main conclusions from local business research?

20. How can these conclusions be used to inform policy and practice?
